

POLI+

ULTRA FINE POLISH FOR GELCOAT

Extremely well balanced composition of very fine abrasives with outstanding rubbing action.

POLI+ perfects burnishing on gelcoat.

POLI+ removes scratches, stains, medium oxidation and deposits without scratching.

POLI+ will give gelcoat and paint a high gloss finish.

POLI+ is a cream of complete polishing allowing to stop micropores of the gelcoat and to blur the microstripes.

Technical Data :

Physical state : Paste

Density : 1400 g/l +/- 20g/l

Viscosity Brookfield : 2538 centipoises, mob 5, vitesse 50 tours/minute at 24°C

Instructions of use :

Apply **POLI+** using a nonfluffy dry rag or an orbital grinding machine provided with a soft felt.

Do not overdose the product, your polishing would be harder and longer.

- Work by small surfaces of 50 by 50 cm.
- Spread the cream.
- Wait a few minutes that the paste **POLI+** impregnates the gelcoat.
- Then carry out a uniform polishing by proceeding circular motions. If you use an orbital machine, work on a speed of 1000-1500 tours minutes
- Pass a clean rag or a soft and clean felt if you used a grinding machine on treated surface.
- Finish polishing by cleaning with a wet sponge to accentuate the brightness.

Ref. 655M - Can of 300 grs
Ref. 655MK - Can of 700 grs
Shelf Life : 2 years

IMPORTANT : Keep out of reach of children. Avoid contact with skin, wear suitable gloves. In case of contact with skin or eyes, rinse immediately and abundantly with clear water. Do not breath vapours. In case of ingestion, do not make vomit, consult a doctor and him(her) show the packaging or the label. Always make beforehand, a test with the surface to be treated to determine the compatibility and the time of contact suited
